PROFESSIONAL SUMMARY

Results-driven Analyst individual with over a year of experience in Finance Operations and a strong foundation in SQL, Python, Power BI, and Tableau. Skilled in exploratory data analysis (EDA), KPI development, dashboard design, and translating complex datasets into actionable business insights. Adept at stakeholder reporting, requirements gathering, and cross-functional collaboration. Currently pursuing a Post Graduate Program in Data Science & Machine Learning (Imarticus Learning). Seeking a Data Analyst role to drive data-driven decision-making.

TECHNICAL SKILLS

Analytics & BI	SQL · Python (Pandas, NumPy) · EDA · Statistical Analysis · Forecasting · Business Intelligence.
Visualization	Power BI (DAX) · Tableau · Google Sheets (Charts) · Looker studio.
Data Skills	MS Excel (Advanced) · Pivot Tables · VLOOKUP · Data Cleaning · Data Validation
BA Skills	Requirements Gathering[BRD/FRD] · Stakeholder Management · KPI Design · Process Mapping .
Soft Skills	Verbal Communication Skills · Problem Solving · Analytical Thinking · Adaptable · Detail Oriented

WORK EXPERIENCE

Data Analyst — Finance Data | April 2024 – Jun 2025

Prashant Goel & Co. · Haryana, India

- Collected, cleaned, and structured financial datasets — applying data validation and accuracy auditing to maintain 100% data accuracy for 3 consecutive months.
- Built and maintained reports, trackers, and dashboards in MS Excel (Power Query, Pivot Tables, VLOOKUP) to monitor business and operational performance, reducing manual reporting errors by 15%.
- Collaborated with internal stakeholders to communicate data findings clearly to both technical and non-technical audiences, supporting decision-making and improving operational efficiency by 20%.
- Documented data processes and reporting standards to ensure consistency, accuracy, and continuity across business functions.
- Built and maintained an ongoing business health dashboard over the course of a year to monitor the company's operational and financial performance, helping stakeholders stay informed and make more confident decisions.

TECHNICAL PROJECTS

Ugao Sales Performance & Margin Analysis [Python · Pandas · NumPy · EDA · Statistical Analysis]

- Conducted EDA on 18,000+ e-commerce transactions to identify profit drivers and pricing inefficiencies; surfaced discount thresholds above 25% as a key margin erosion driver, enabling a revised seasonal pricing strategy.
- Mapped Cash-on-Delivery as the highest return-rate channel through cohort analysis, highlighting 10% logistical cost savings via targeted operational recommendations.
- Delivered a root cause analysis report for stakeholders, translating data findings into actionable business decisions projected to improve margins by 12–15%.

Pizza Sales Business Intelligence Dashboard [Power BI · DAX · Requirements Gathering · KPI Design]

- Designed an interactive Power BI dashboard from gathered business requirements, improving sales trend visibility for inventory planning by 20%.
- Defined and tracked 4 KPIs using DAX measures for product category performance, enabling management to prioritize high-margin inventory and reduce waste.
- Identified 6–10 PM as peak demand windows through time-series analysis; data-backed operational plans improved staff utilization by 15%.

Uber Trip Business Dashboard [MS Excel (Advanced) · Pivot Tables · Data Reporting]

- Analyzed 1,000+ trip records using Pivot Tables and advanced Excel functions to uncover high-demand vehicle type patterns, supporting a 20% more efficient fleet allocation strategy.
- Built a revenue monitoring interface with zero duplicate entries, reducing manual reporting time by 25% and maintaining 100% data integrity over 3 months.

EDUCATION

Post Graduate Program: Data Science & Machine Learning Jul 2025 – Present (Pursuing) – Imarticus Learning.

Bachelor of Business Administration (BBA) Jul 2019 – Jul 2022 – Indira Gandhi University, Meerpur.
